You can vary this - the key is to do it.

You can go out of the box, watch what other people are doing, use tools, tips, tricks anything you encounter to get traffic.

You can use offline methods.

You can hire people to drive traffic to your site.

You can get joint venture partners and do a launch or relaunch.

Getting traffic is an endless game and is the lifeblood of your business - so don't get stuck in the business, unless you are working on traffic.
